

Web Development Lab (Assignment 1) - Submission

Campus Event Board - IIIT Vadodara

Do this / How

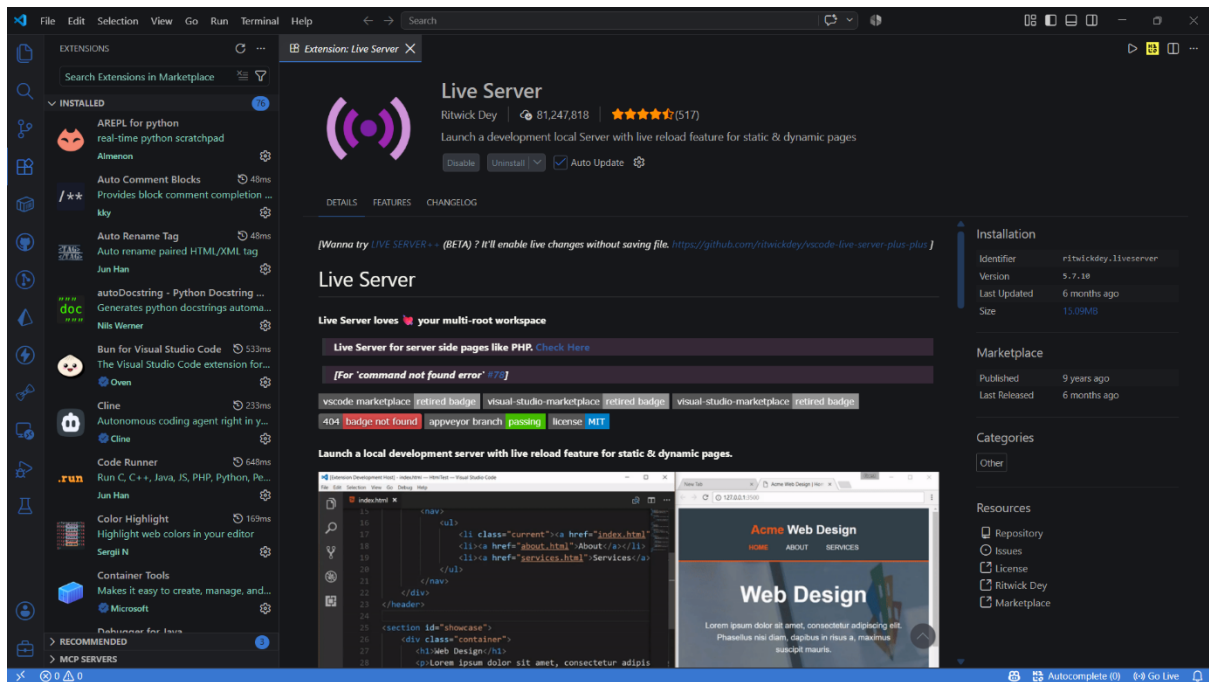

1 Install Visual Studio Code

Download it free from code.visualstudio.com. This is where you will write all your code. Install it with the default options.

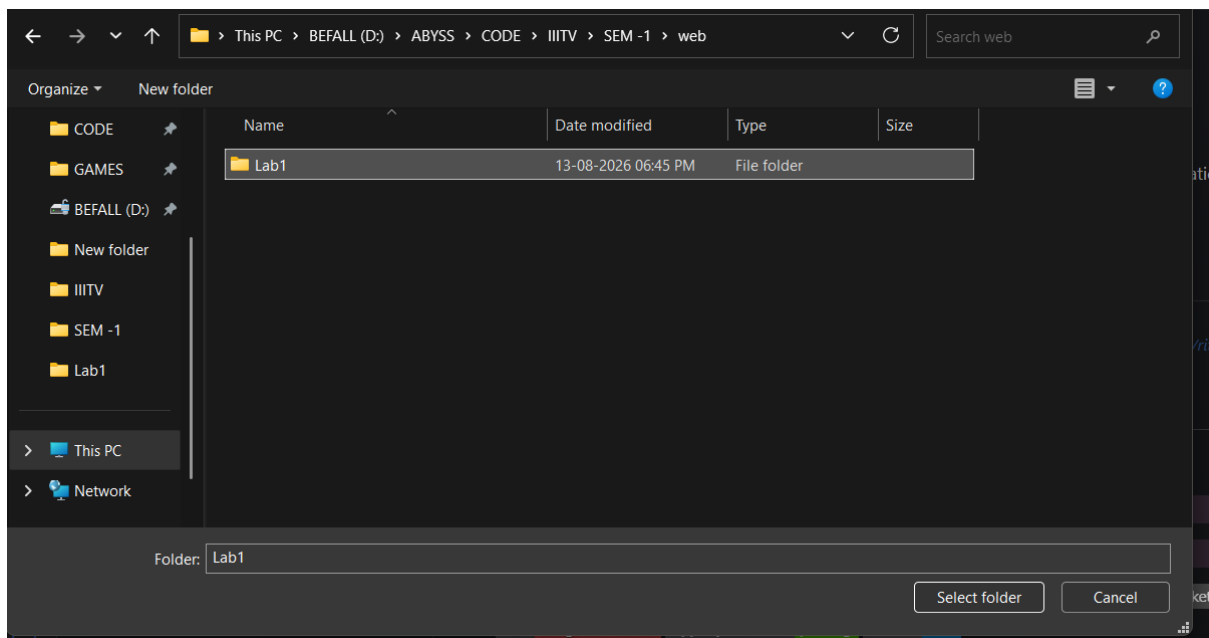

2 "Live Server" extension in VS Code

Right-click and "Open with Live Server". The page reloads automatically every time you save.

3 Make your project folder

Create a folder called event-board. Open this folder in VS Code with
File -> Open Folder.

4 Create the home page file

Inside the folder, make a new file called index.html. The name index is

special - it is the page a site shows first.

5 Write a minimal page

Type a basic HTML page with a heading that says "Campus Event Board". Include elements as per your wish. Save with Ctrl+S.

```
1  <!doctype html>
2  <html lang="en">
3    <head>
4      <meta charset="UTF-8" />
5      <meta name="viewport" content="width=device-width,
6        initial-scale=1.0" />
7      <title>Campus Event Board</title>
8    </head>
9    <body>
10     <center>
11       
13       <h1>Campus Event Board</h1>
14       <h2>Indian Institute of Information Technology Vadodara</
15         h2>
16     </center>
17     <p>Welcome to the Campus Event Board. Find all the latest
18       events and activities happening on campus.</p>
19     <hr />
20     <h3>Upcoming Events</h3>
21     <ul>
22       <li>Tech Talk: Introduction to AI - Monday, Auditorium</li>
23       <li>Coding Hackathon - Friday, CS Block</li>
24       <li>Cultural Fest - Saturday, Main Grounds</li>
25     </ul>
26   </body>
27 </html>
```

6 Open it in the browser

Double-click index.html in your folder, or drag it onto the browser

window. You should see your heading and sentence.

7 Look at what the browser received

Right-click the page and choose "View Page Source". This is the exact HTML the browser read. Notice it is the text you wrote.

The screenshot displays a web browser window with the source code of a page titled "Campus Event Board" from the Indian Institute of Information Technology Vadodara. The page content includes a logo, a heading, a welcome message, and a list of upcoming events. The browser's developer tools are open, showing the HTML structure and the "body" element's styles.

Campus Event Board

The developer tools show the following HTML structure:

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <body>
      <center>
        <p></p>
        <hr>
        <h3>Upcoming Events</h3>
        <ul>
          <li>Tech Talk: Introduction to AI - Monday, Auditorium</li>
          <li>Coding Hackathon - Friday, CS Block</li>
          <li>Cultural Fest - Saturday, Main Grounds</li>
        </ul>
        <hr>
        <div>Contact Us</div>
        <p></p>
        <p></p>
        <p></p>
        <p></p>
        <hr>
        <div>Footer</div>
        <!-- Code injected by live-server -->
        <script></script>
      </body>
    </html>
```

The styles panel shows the following styles for the body element:

```
body {
  display: block;
  margin: 8px;
}
```
